When it comes to rental power,
we speak your language

Whenever and wherever you need rental power, call on us

Cummins Power Generation has earned a reputation as a global provider of reliable on-site rental power systems. For good reason: we understand the rental power business and can deliver whatever you need, wherever you need it, around the world.

Our rental expertise is focused on delivering total mobile power solutions that solve your — and your customers' — biggest challenges. Look to us as your single source for reliable products, customized configurations, easy installation and excellent local support.

Whatever your rental power requirements

We offer a full range of rental power solutions:

- Reliable, pre-integrated systems that are designed to work together and built for long runtimes in harsh environments
- Rental generator sets up to 2 MW with an easy-to-operate interface
- Configurations and features to meet local requirements and regulations, e.g., sound attenuation
- Single unit to turnkey packages including product specifications, delivery, start-up, fueling and 24/7 support
- Turnkey packages include everything you need in a rental power system, e.g., load banks, fuel tanks, transformers, distribution panels and power cables.

Whatever your need for ease of rental operation

Configured especially for the rental power market, these generator sets are packaged with an easy-to-operate customer interface, allowing quick voltage changes to maximize flexibility and minimize setup. Once on the job, these units:

- Provide up to 39 hours of fuel capacity
- Provide industry-leading containment capabilities
 - Overflow can hold up to 110% of all fluids within the baseframe
- Operate reliably in high altitudes and high temperatures of up to 122°F (50°C)
- Meet all applicable emission standards

Whatever your customer's application

You can choose from a wide variety of rental power systems, from 60 kW–2 MW, to provide reliable short-term and long-term cost-effective power solutions for your customers. These systems are well suited for:

- Prime power
- Backup power for scheduled maintenance
- Standby/peaking power for a large utility
- Temporary power for a special event
- Emergency power after a natural disaster

Whatever your customer's industry

You can depend upon Cummins Power Generation to provide rental power solutions for widely diverse industries, including:

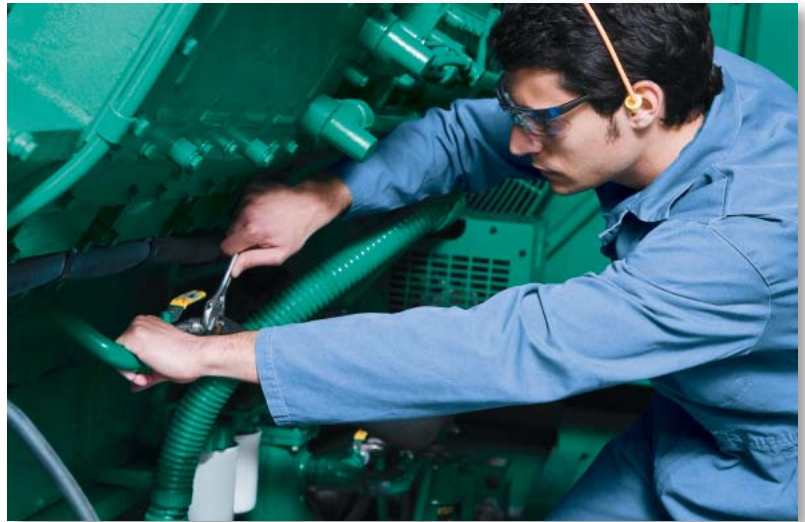

- | | | | | |
|-----------------|----------------------|-----------------|-------------------|-----------------|
| ■ Commercial | ■ Telecommunications | ■ Entertainment | ■ Retail services | ■ Hospitality |
| ■ Manufacturing | ■ Data centers | ■ Oil & Gas | ■ Healthcare | ■ Utilities |
| ■ Construction | ■ Mining | ■ Government | ■ Media | ■ Institutional |

Whatever your need in expert service and support

The Power of One™ means that the components of a Cummins Power Generation system are designed and built to work together. So you get a proven, reliable product. You also benefit from one source for service and support after the sale. Our global distributor network has factory-trained and certified technicians ready to provide both scheduled and emergency service. In addition, our global stocking plan has warehouses and service vehicles fully stocked with parts.

Whatever your need, you get the best value

Rental power solutions from Cummins Power Generation offer you multiple advantages — top performance, second-to-none reliability, technical innovations, application and configuration versatility, emissions leadership and expert service. Add our worldwide rental business experience, and you receive the best value in rental power equipment for you and your customers.
